

Certified Weed Free GetGo™

Scientifically formulated and field-tested for the new additions in your barn, GetGo™ takes the guesswork out of your foal's feeding program by balancing the ration to fill the special needs of growing bones and tissues. From birth to 3 months you can provide GetGo™ as a supplement to mother's milk mixed 50:50 with Stable Mix™. GetGo™ can be fed as a complete feed AFTER your foal reaches 3 months THROUGH 18 months.

GetGo™ is designed to be fed as a sole-source feed by blending quality hays and concentrates with a vitamin and mineral supplement. For best results, follow the feeding guidelines on the reverse side. Adjust your foal's growth rate and performance on GetGo™. Feed at least twice a day. Horses must have access to plenty of fresh, clean water at all times except when tired and hot. Store feed in a cool, dry place.

DO NOT feed moldy or insect infested feed. DO NOT FEED THIS PRODUCT WITH ANY OTHER GRAINS OR SUPPLEMENTS, NOR WITH ALFALFA.

GUARANTEED ANALYSIS:

Crude Protein	Minimum	14.0%
Crude Fat	Minimum	3.0%
Crude Fiber	Maximum	25.0%
Calcium	Minimum	0.5%
Calcium	Maximum	1.0%
Phosphorus	Minimum	0.25%
Sodium	Maximum	0.5%

With

Zinpro 4 Plex C - 425 mg per lb
Zinpro 120 - 115 mg per lb

*Not necessary to add additional vitamins/minerals to this feed

INGREDIENTS:

Alfalfa Meal, Mixed Grain Hay, Almond Hulls, Soybean Meal, Rice Bran, Distillers Dried Grains, Cane Molasses, Ground Limestone, Salt, Monocalcium and Dicalcium Phosphate, Manganese Methionine Complex, Copper Lysine Complex, Cobalt Gluceptonate, Magnesium Oxide, Vitamin E Supplement, Zinc Methionine Complex, Mineral Oil, Manganese Sulfate, Sodium Selenite, *Saccharomyces Cerevisiae* Yeast Culture, Biotin, Hydrolyzed Yeast, Processed Grain By-Products, Dried *Lactobacillus Acidophilus* Fermentation Product, Dried *Lactobacillus Casei* Fermentation Product, Dried *Enterococcus Faecium* Fermentation Product, Dried *Bifidobacterium Longum* Fermentation Product, Dried *Aspergillus Oryzae* Fermentation Extract, Ethylenediamine Dihydroiodide, Vitamin A Supplement, Vitamin D3 Supplement, Riboflavin Supplement, Thiamine Monobitrate, Propionic Acid, Ammonium Hydroxide, Acetic Acid, Benzoic Acid, Sorbic Acid, Tartaric Acid, Vermiculite, Ground Corn Cobs, Silicon Dioxide, Oil of Orange.

Ruminant Meat and Bone Meal Free

DO NOT FEED TO SHEEP

Certified Weed Free

GetGo™

FEEDING RECOMMENDATIONS FOR GETGO™:

The amount of feed will be based on the foal's weight and acceptance of GetGo™. All foals should be started at the Low Range as this allows for a smooth transition and aids in overall performance of GetGo™. After approximately 2 weeks, the foal should be moved to the Mid Range category. At this point, he is ready to fully utilize the feed. Those foals for which maximum, rapid growth is desired can (with careful attention to the joints) have their rations increased to the High Range after 2 weeks at the Mid Range. As the foal gains weight, the amount of feed should be increased within the same Range category he is in at the time.

**DO NOT FEED THIS PRODUCT FREE CHOICE.
FOLLOW FEEDING INSTRUCTIONS CAREFULLY.**

POUNDS OF GETGO™ PER FOAL'S WEIGHT based on a mature weight of 1,000 lbs

Foal/Yearling Weight	Low Range	Mid Range	High Range
400 lbs	5.50 lbs	7.00 lbs	8.00 lbs
500 lbs	6.75 lbs	8.25 lbs	9.50 lbs
600 lbs	8.00 lbs	10.00 lbs	11.50 lbs
700 lbs	9.00 lbs	11.25 lbs	13.00 lbs
800 lbs	10.00 lbs	13.50 lbs	14.75 lbs
900 lbs	11.25 lbs	14.00 lbs	16.50 lbs
1000 lbs	12.50 lbs	15.50 lbs	18.00 lbs

From 750 lbs and up, if you are not pushing the foal for fast development, you can begin cutting the ration down using StableMix™ to replace some of the GetGo™. By the time the foal is 14 months old, he can be transferred completely to StableMix™. If the foal is going into an early training program, a portion of the ration should continue to be made up of either GetGo™ or UltraMate™. This will keep the energy levels up and vitamins and minerals at the levels needed by a young horse in training.
