 **LIFEFORCE Formula®**

Backed by science, these solutions have been added to the **Stable Max** lineup of products to enhance health and performance.

Gut and immune health support	Builds natural defenses
	Maximizes health during periods of high stress
	Aids in nutrient absorption
	Safeguards health to maximize well-being
	Reduces the damaging effects of challenged feedstuffs in your most sensitive animals
	Increases animal performance parameters and reproductive health

Skin, coat, hoof and bone health support	Provides trace mineral nutrition in a form as close to nature as possible
	Supports mineral absorption and retention
	Copper promotes healthy connective tissue and immune function

Selenium yeast	Supports immune health
	Supports reproductive function
	Supports mineral retention
	Protects in times of stress
	Supports the body's defense against infection

Yucca	Binds ammonia and controls fecal odors
	Helps maintain healthy respiratory function

Enzymes	Combination of naturally occurring enzymes including protease and cellulase
	Aids in digestion of vegetable protein
	Optimizes nutrient release
	Drives feed digestibility
	Decreases nutrient waste into the environment

Feed efficiency	Promotes nutrient utilization
	Increases fiber digestion and performance by enhancing the uptake of energy from feed

Probiotics	Beneficial bacteria for gut health

# Elk Grove Milling

*The Horse Feed Specialists*

Our pellet mill, which is nestled in the heart of horse country just a few minutes out of the city of Elk Grove, has been producing high-quality horse and animal feed since 1982. Local horse owners have placed their trust in our product for years.

**Stable Max** is a premium feed line powered by Alltech solutions to provide targeted support to meet your horse's daily nutrient requirements. Formulated with the active performance horse in mind, Stable Max uses Alltech nutritional solutions to bolster the nutrient profile, delivering solutions to meet the needs of horses in all stages of their competitive lives and beyond.

A premium feed line that provides targeted support to meet your horse's daily nutrient requirements

8320 Eschinger Rd.  
Elk Grove, CA 95757

# Stable Max: Three formulas powered by LIFEFORCE Formula® to support:

Digestibility

Gut health

Feed efficiency

Immune health

Skin, coat, hoof and bone integrity

Probiotics

## STABLE MAX™ Ultra Mate

**Protein – 30% Fat – 2% Fiber – 6%**

- Nutrient-dense, low-calorie ration
- Supplemented with necessary vitamins and organic minerals
- Concentrated ration balancer
- Intended to be fed alongside high-quality hay or pasture

### Feed rate:

Feed along with 1.75-2% quality hay or pasture. Breeding stallions, pregnant or lactating mares may need additional protein in ration.

Activity level	Feed rate (lbs/day)*
Maintenance, AVG	.5-1#
Light work	.75-1#
Moderate	1#
Heavy	1-1.5#
Intense work	1.5#
Pregnant	1.5#
Late gestation	1.5#
Early lactation	1.5#
Stallion, breeding	1#

\*Suggestions vary according to forage quality, body condition, and environment.

Available in bags

## STABLE MAX™ Performance

**Protein – 14% Fat – 10%  
Fiber – 10%**

- Increased calories and protein to fuel a competitive edge
- Cool energy from CoolStance
- Contains fat from rice bran and copra meal
- Fiber-rich formulation with beet pulp
- Supplemented with vitamins and minerals for health and performance

### Feed rate:

Feed along with 1.75-2% quality hay or pasture. Breeding stallions, pregnant or lactating mares may need additional protein in ration.

Activity level	Feed rate (lbs/day)*
Maintenance, AVG	4-5#
Light work	6#
Moderate	7#
Heavy	7-9#
Intense work	8-9#
Stallion, breeding	6-7#

\*Suggestions vary according to forage quality, body condition, and environment.

Available in bags or barrels

## STABLE MAX™ Senior Lite

**Protein – 13% Fat – 5% Fiber – 23%  
NSC max – 12%**

- Complete feed
- Enhanced with Alltech nutritional solutions
- Low-NSC
- Ideal for performance horses needing low sugar and starch
- Maintains bioavailability of nutrients

### Feed rate:

1.5-2 lbs per 100 lbs of body weight when fed as a sole ration. When fed in combination with hay, feed at a rate of 0.5 to 1.0lbs per 100lbs of body weight a day in addition to 1-1.5% body weight of good quality hay.

Body weight, lbs	Feed rate (lbs/day)*
1000	15-20#
1250	12.5-25#
1500	22.5-30#

\*Suggestions vary according to forage quality, body condition, and environment.

Available in bags or barrels
